## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 15 and 18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U. S. Patent No.5,978,475 to Schneier et al.

As per claims 1, 15 and 18, Schneier et al. disclose generating an ad hoc public key ....., , encrypting the private key ..... and encrypting the electronic message.....(col. 8, lines 51-58), storing in a key server.....(col. 4, lines 51-62) and creating an index value.....(see at least the abstract).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schneier et al. as applied to claims 1, 15 and 18 above, and further in view of the examiner taking official notice.

As per claims 2, 3 and 5, Schneier et al do not specifically disclose the limitations of these claims. The examiner, however, takes official notice that these elements are well known in the art of security systems . It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have included these features in the invention of Schneier et al.since they comprise very well known elements necessary for the entire system to function in a secure and controlled environment.

#### ***Allowable Subject Matter***

Claims 8-14 are allowed.

Claims 4, 6, 7, 16, 17, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
